

Dynamic IPv4

A dynamic IP is a public IP which can change at any time.
It will allow you to access the Internet directly without a device changing the packets.
The IP is directly located on your router, thus allowing external access to it.

Use cases

- Online gaming
- Remote access to network or computers

Useful commands

Command	Description
order dyn	Get a dynamic IPv4 address
cancel dyn	Cancel your dynamic IPv4 address

Montly price

1,55€
