

# Fix IPv4

A fixed IPv4 address is a public address assigned to your account which will remain the same no matter what happens.

This allows for remote access to your network and servers without the need for a dynamic DNS service

## Use cases

- Public server hosting
- Remote network access

## Useful commands

Command	Description
order fix	Get a static IPv4 adress
cancel fix	Cancel your static IPv4 address

## Montly price

9,55€
